### **Trillium Health Centre Signs 5 Year Agreement With Salumatics to Provide Hosting of Health Records**

Mississauga, ON (August 25, 2010) – Salumatics Inc. and Trillium Health Centre today announce a five (5) year agreement that will see Salumatics provide remote hosting of Trillium Health Records in SaluVision®, a platform independent Software as a Service (SaaS) software product.

“Trillium Health Centre is a unique tertiary care community hospital that is working to meet a growing demand in for health care services in Mississauga and west Toronto,” said Allan Magnacca, President of Salumatics. “By using our software, Trillium will be able to integrate their electronic and paper records and expedite access to patient health information.”

The SaluVision SaaS platform provides Trillium with a cost effective secure alternative to expensive legacy based Electronic Document Management Systems.

SaluVision enhances Salumatics’ already robust product offerings at Trillium which include document conversion, data hosting and disaster recovery, and allow multiple users to concurrently and securely access data instantly from any web browser.

Built using Web 2.0 technology, SaluVision delivers a RIA (Rich Internet Application) interface with better functionality and usability than found with legacy based systems.

The SaluVision SOA (Service Oriented Architecture) model does not require any expensive upfront infrastructure investment and Salumatics’ extensive experience permits rapid deployment of the complete solution.

“SaluVision will provide the needed redundancy to ensure that critical information is always available to our clinicians,” said May Chang, VP, Decision Support and Chief Financial Officer for Trillium Health Centre. “We continue to benefit from our strong partnership with Salumatics which has helped us integrate our paper and electronic patient records to better serve our patients.”

**About Salumatics Inc.**

Salumatics is a health information management company providing a range of services and solutions to health care providers, industry and government. Salumatics' services include records conversion, remote coding & abstracting, data hosting & disaster recovery, and transition readiness consulting. Their SaluVision electronic document management solution is a platform-independent Software as a Service (SaaS) system built using Web 2.0 technology. Salumatics has provided services for dozens of healthcare providers across North America since their inception in 2000, with privacy, confidentiality and security policies in compliance with applicable legislation. A private Canadian company, Salumatics has facilities in Toronto and Montreal.

**About Trillium Health Centre**

Trillium Health Centre is one of Canada's largest academically-affiliated tertiary care hospitals with highly-specialized regional programs in advanced cardiac, vascular, stroke, neurosciences, orthopaedic, and sexual assault/domestic violence services. Housing a model ambulatory care centre and the largest free standing day surgery centre in North America, Trillium serves over one million residents in Peel and West Toronto and from other communities across Ontario. Last year Trillium's doctors, staff and volunteers cared for more than 700,000 patients at the Mississauga (100 Queensway W.) and West Toronto (150 Sherway Dr.) locations. With the continued support of the Trillium Health Centre Foundation, the hospital's fundraising arm, the two-site facility is attracting international attention for its innovative approach to providing safe, high quality health care services and has received numerous national awards for quality and innovation.
